

Student Canine Case Study

ZENA

- 12 ½ years old Bouvier des Flandres dog
- In light to poor condition

History & Symptoms

- Not eating, dull coat and not alert
- Grieving the loss of Goober her dog friend, she is very depressed and upset with the loss.
- Ripping out hair, right ear itchy and starting to smell

The owner was on the point of putting Zena to sleep as Zena was feeling so retched; she did not know how to help Zena to recover. The owner did not want to give her drugs.

SESSION 1 – 10/10/06 – Energy Balance & Heart Chakra Healing

Intention: relaxation and to relieve grief
Zena accepted the treatment and relaxed well.

SESSION 2 - 17/10/06 – Energy Balance

Intention: to help relieve the emotion
She's **much better emotionally** and her **hair and skin has improved a lot**; the hair is growing back.

Zena was very keen to receive her session. She had been great all week but was reverting back to being stressed and grieving again.

She was very perky after this treatment.

SESSION 3 – 25/10/06 – General Energy Balance

Her left foreleg was sensitive and she had a large release at the top of her shoulders. There was extreme heat throughout the shoulder and right loin areas which cooled nicely after the release.

Zena carried her head higher after treatment and she was more energetic for once and asked her owner to take her for a walk. **A very happy dog.**

Owners Feedback

The owners **are ecstatic with the changes in Zena**. She is now asking to go for walks, barking, wagging her tail, actually separating herself comfortably from her carer and carrying her head higher.
